DESIGN ELEMENTS THROUGHOUT THE COLLECTION

Logo extender chains are included on most necklaces. The extender gives flexibility to the consumer to adjust the necklace to his or her length preference. In addition, it allows the dealer to purchase less skus.

New earring backs for all earrings showcase the bar and shield logo.

Adjustable closure on both necklaces and bracelets creates an easy solution for all sizing needs.

MATERIALS USED THROUGHOUT THE COLLECTIONS:

Rich, genuine leathers in brown and black colorations

Semi-precious materials like Tiger's Eye, Mother of Pearl and Amethyst.

Cubic Zirconia which is a diamond simulant composed of zirconium dioxide.

Sterling Silver metal which is 92.5% silver and 7.5% other alloys. All Sterling Silver styles are marked with .925.

Stainless Steel which is an alloy of iron that is resistant to rusting and corrosion

Lab Grown Diamonds- like their natural counterparts, have the same crystal structure, consisting of tightly bonded carbon atoms. This results in nearly the same chemical, optical and physical properties as natural diamonds.

PVD plating- also referred to as Ion Plating is a process commonly used in watches. It provides an additional level of protection
